

Side-Power Fall Show Special

Purchase Side-Power's revolutionary "SEP" Speed Control DC Thrusters or "On/Off" Thrusters and receive a control panel for free! The On/Off Thrusters include a choice of controls: touchpanel, joystick or boat-shaped.

SIDE-POWER 
Thruster Systems 

SEP KEY BENEFITS

- Precise control of thruster power level
- Easy, fingertip operation with one hand
- Smooth, stepless power delivery
- Quieter operation so they don't hear you coming & going
- Extended run-time - especially at lower power levels
- Hold function for docking reduces the need for additional crew
- Intelligent panel displays system status (current operation, remaining run-time) as well as system fault diagnostics
- CAN-bus communication with S-Link control circuit
- Solid state switching
- Simple transition for builders as an upgrade to On/Off thrusters
